

SAFEGUARDING UTAH STUDENTS

Students are facing mental health and wellness challenges like never before. Now is the time to get ahead and safeguard student needs before they ever become a crisis.

Responding to a student in crisis is:

The most costly student support

The most time-consuming student support

Has the least impact on student outcomes

Utah leads the nation in how it responds to students in crisis, but prevention begins with early case management of low-level student concerns. Safeguarding helps schools tackle the mental health, social, and welfare traumas derailing our Utah students.

With Safeguarding, Utah schools can:

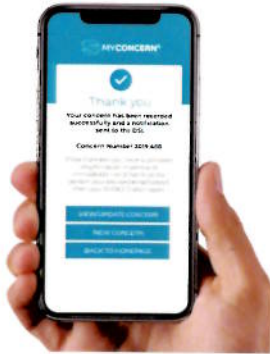

- Efficiently case manage:
 - Bullying, Harassment, Trauma and Abuse
 - Mental and Physical Health Needs
 - Truancy and Student Absences
 - Threat Assessment and Incident Reporting
 - Social Welfare, Referrals and Supports
- Centralize and integrate student alerts and reporting
- Analyze real-time disaggregated data at the school, district and state level
- Identify trends, guide resource allocation, and inform policies and procedures
- Guarantee student privacy with FERPA compliance and secure encrypted data
- Communicate transparently with parents and comply with Utah Code 53G-9-604
- Increase efficiency of student support services with an average 25% reduction in time and 30% reduction in costs

"There comes a point where we need to stop just pulling people out of the river. We need to go upstream and find out why they are falling in." -- Desmond Tutu

SUPPORT SAFEGUARDING UTAH STUDENTS

SAFEGUARDING: EARLY PREVENTION CASE MANAGEMENT

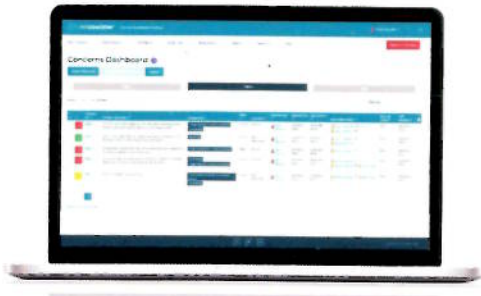

1 Report Student Needs, Observations, Tips & Concerns

Teachers, Staff, & Administrators:

- Report incidents and concerns from any device
- Import alerts and concerns from other apps
- Submit evidence and supporting documentation
- Associate different students to a case
- Edit and add chronology to cases
- Maintain student data privacy and security

2 Case Manage Student Needs, Track & Provide Supports

Admins/Counselors:

- Document and assign all submitted concerns and incidents to a student and/or case
- Organize collaborative teams
- Refer to district and outside services
- Manage private and secure communications, including with parents
- Track all actions related to a student
- Export reports and audits with auto-redaction

3 Analyze Real-time Disaggregated Data

School, District & State Admins:

- Access real-time data dashboards at the school, district, and state level
- Analyze disaggregated data to understand student trends and concerns
- Guide resource allocation, policy revisions, and procedural implementation
- Maintain student privacy with fully anonymized data charts and analytics
