

Pollinator HB 327 Amendments

The Utah Pollinator Working Group was developed with representation from:

- Utah Department of Agriculture and Food
- Utah Division of Wildlife Resources
- Utah State University
- Utah State University Extension
- Southern Utah University
- Department of Natural Resources
- Natural Resource Conservation Service

Between July 1 - July 31, 2022 UDAF accepted 326 online applications

- 110 applicants were awarded bare root plants ~ 220,500 sq feet
- 165 applicants were awarded seed packets ~ 24,750 sq feet

Additional plants & seeds curated through this program have been incorporated into programs such as: watershed restoration programs, Jordan River walkway

Extending the sunset will allow UDAF to expand their work and focus more on plants suitable for Southern Utah planting zones, as well as enable the program to invest in more seeds and plants that will allow the program to be more self sustaining.
