

HB470

GOVERNMENT RECORDS AMENDMENTS

What is a Verifiable Digital Signature, Credential, or Record?

"An electronic version that conveys rights, privileges, and legal enforceability equivalent to the possession of a physical signature/credential/record of the same type."

What Does this Bill do?

- Enables governance and oversight for Government Digital Verifiable Electronic Records (ensure privacy, security, auditability, preservation)
- Directs a working group to make recommendations on the policies, procedures and standards for government issued digital records
- Authorizes the Department of Technology Services to conduct a digital verifiable credential pilot, and report back to the legislature

What Does this Bill NOT do?

- Does NOT require any individual to start using digitally verifiable electronic records
- Does NOT require any political subdivision of the State to start using digitally verifiable electronic records
- Does NOT put Personal Identifiable Information (PII) at risk

Government Digital Verifiable Records Working Group

- State Chief Information Officer (Chair)
- State Privacy Officer or appointee
- Government Operations Privacy Officer or appointee
- State Archivist or appointee
- State Registrar or appointee
- Representatives from Cities & Counties
- Technical Experts from the private sector

Digital Verifiable Credential

A digital document that attests to a fact, for example:

- Marriage license
- Professional occupational license
- Food handlers permit
- Beekeeping license
- Fishing or hunting license

Digital Verifiable Record

A government-issued or approved digital record, for example:

- Vehicle title
- Real property title
- Contract
- Will
- Educational Transcript
