Utah Trail Network

SB-185

- \$45 million one time, \$45 million ongoing
- Planning, design, construction, maintenance, reconstruction, or renovation of paved pedestrian or non motorized trail projects that:
 - are prioritized by the commission
 - Serve a regional purpose
 - are part of an active transportation plan, or statewide network plan

Guiding Principles of Utah Trail Network program have been developed

Connection Requirements:

Connect multiple communities and/or regional destinations

Safety & Comfort Requirements:

Safely accommodate a broad range of trail users from children to older adults

Trail Feasibility Requirements:

Build trails according to best design practices

Utah Trail Network

Association of Governments level stakeholder workshops are underway.

Learn about the UTN process for project selection and guiding principles of the program.

Identify potential projects for the UTN based on local and regional input.

Imagine new regional trail connections that are not on a plan but would provide a critical link.

Utah Trail Network

Next Steps

- Program two years worth of projects early next year
- Utah Trail Network website:
