

Opioid Use Disorder treatment in Utah's prisons

Health & Human Service Interim Committee

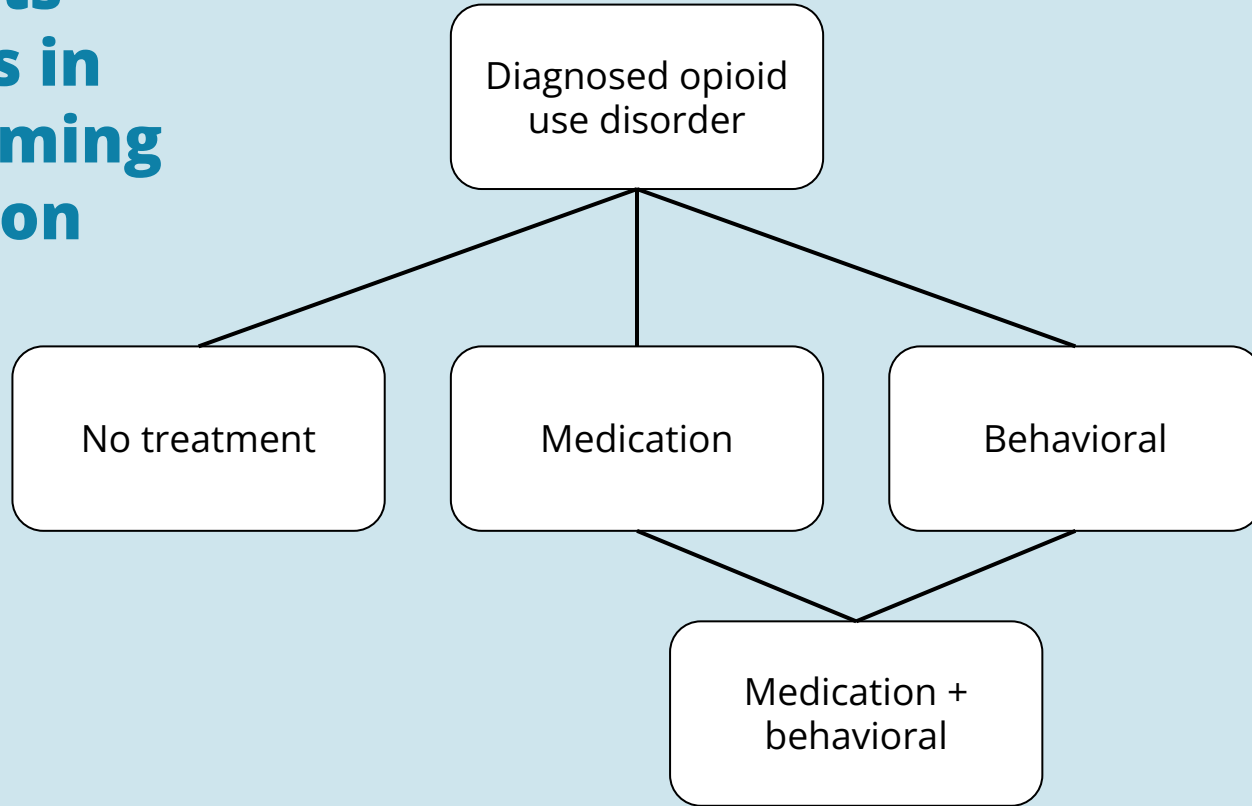

Statutes

Statutes provide the legal authority for correctional facilities to implement Medication-Assisted Treatment (MAT) programs.

This enables rather than mandates their adoption.

Medication supports success in overcoming addiction

Treatment among the prison population

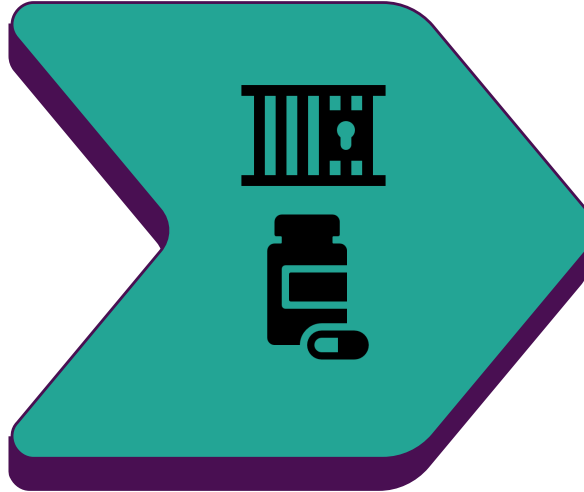

≈**6300** people are incarcerated in Utah state prisons.

1827 inmates likely have *opioid use disorder* (OUD).

370 inmates are being treated for *opioid use disorder*.

Pregnant women

Parole Violator

- 6 months or less release
- Active treatment program within 6 months
