

# Pretrial Tools & Domestic Violence

**Commission on Criminal & Juvenile Justice (CCJJ)**  
**Statewide Information & Analysis Center (SIAC)**  
**Administrative Office of the Courts (AOC)**

# DVOT

- Domestic Violence Offender Treatment Board (DVOT)
  - Under Commission on Criminal and Juvenile Justice (CCJJ)
- 17 stakeholders across Utah
  - Including prosecution, defense, victim advocates, mental health, law enforcement
- Committed to enhancing public safety through research, discussion, and advising on the Domestic Violence Population
  - Evaluation
  - Treatment
  - Monitoring

# Risk Assessment

- Topic of interest and discussion for a number of years
  - 3 years ago
    - DVOT
- Explore approaches to risk assessment and management through all avenues
  - focus on public safety
- LAP
  - Lethality Assessment Protocol
  - Assess risk of lethality and providing appropriate resources to victims
- Next step
  - Assess risk of offenders
  - 2025 Interim Study Item

# **UTAH'S INTIMATE PARTNER VIOLENCE LETHALITY ASSESSMENT**

**PROTOCOL**

# SB 117

## Assess

Law Enforcement  
will assess the  
victim's risk of  
homicide based on  
the LAP's scoring  
mechanism

## Share

The LAP is sent to  
the SIAC which  
provides a response  
to officers with  
additional  
information from  
other incidents

## Connect

Law Enforcement  
will connect the  
victim with a local  
domestic violence  
service provider

## Assess

Law Enforcement  
will assess the  
victim's risk of  
homicide based on  
the LAP's scoring  
mechanism

# LAP DATA

(U)LAP Data from July 2023 through June 2025, a total of 22,252 Intimate Partner Violence Lethality Assessment Protocols (LAPs) were submitted Among those

- 62% of the LAPS were assessed as **POTENTIALLY LETHAL**
- 31% of the LAPS were assessed as **NOT POTENTIALLY LETHAL**
- 7% were **UNABLE TO DETERMINE**

# LAP Case Support Sample Summary Results

## Share

The LAP is sent to the SIAC which provides a response to officers with additional information from other incidents

### Sample Negative Summary

- Warrants: Negative
- Protective Orders: Negative
- Corrections Probation (O-Track): Negative
- UT Criminal History: Negative
- Out of State Criminal History: Negative
- Domestic Violence Flag: Negative
- Previous LAP Involvements: Negative
- Gun Denials: Negative
- Utah Concealed Weapons Permit: Negative
- Other involvement flags: Negative
- Optional (attached) TLO Locate Report
- (attached) Other Agency RMS Involvements

### Sample Criminal History and DV Flags

- **Corrections Probation (O-Track): Felony probation**
- **Criminal History: 7 arrests, most recent 2023**
- **UT Criminal History: Domestic Violence Flag: DV Arrest, convicted 2016**
- **Out of State Criminal History: 1 arrest**
- **Utah Concealed Weapons Permit: Current CFP, expires 2025 - Revoked 2022**
- **Other involvement flags: DV callout, no charges filed 2018**
- Warrants: Negative
- Protective Orders: Negative
- Previous LAP Involvements: Negative
- Gun Denials: Negative
- Optional (attached) TLO Locate Report
- (attached) Other Agency RMS Involvements

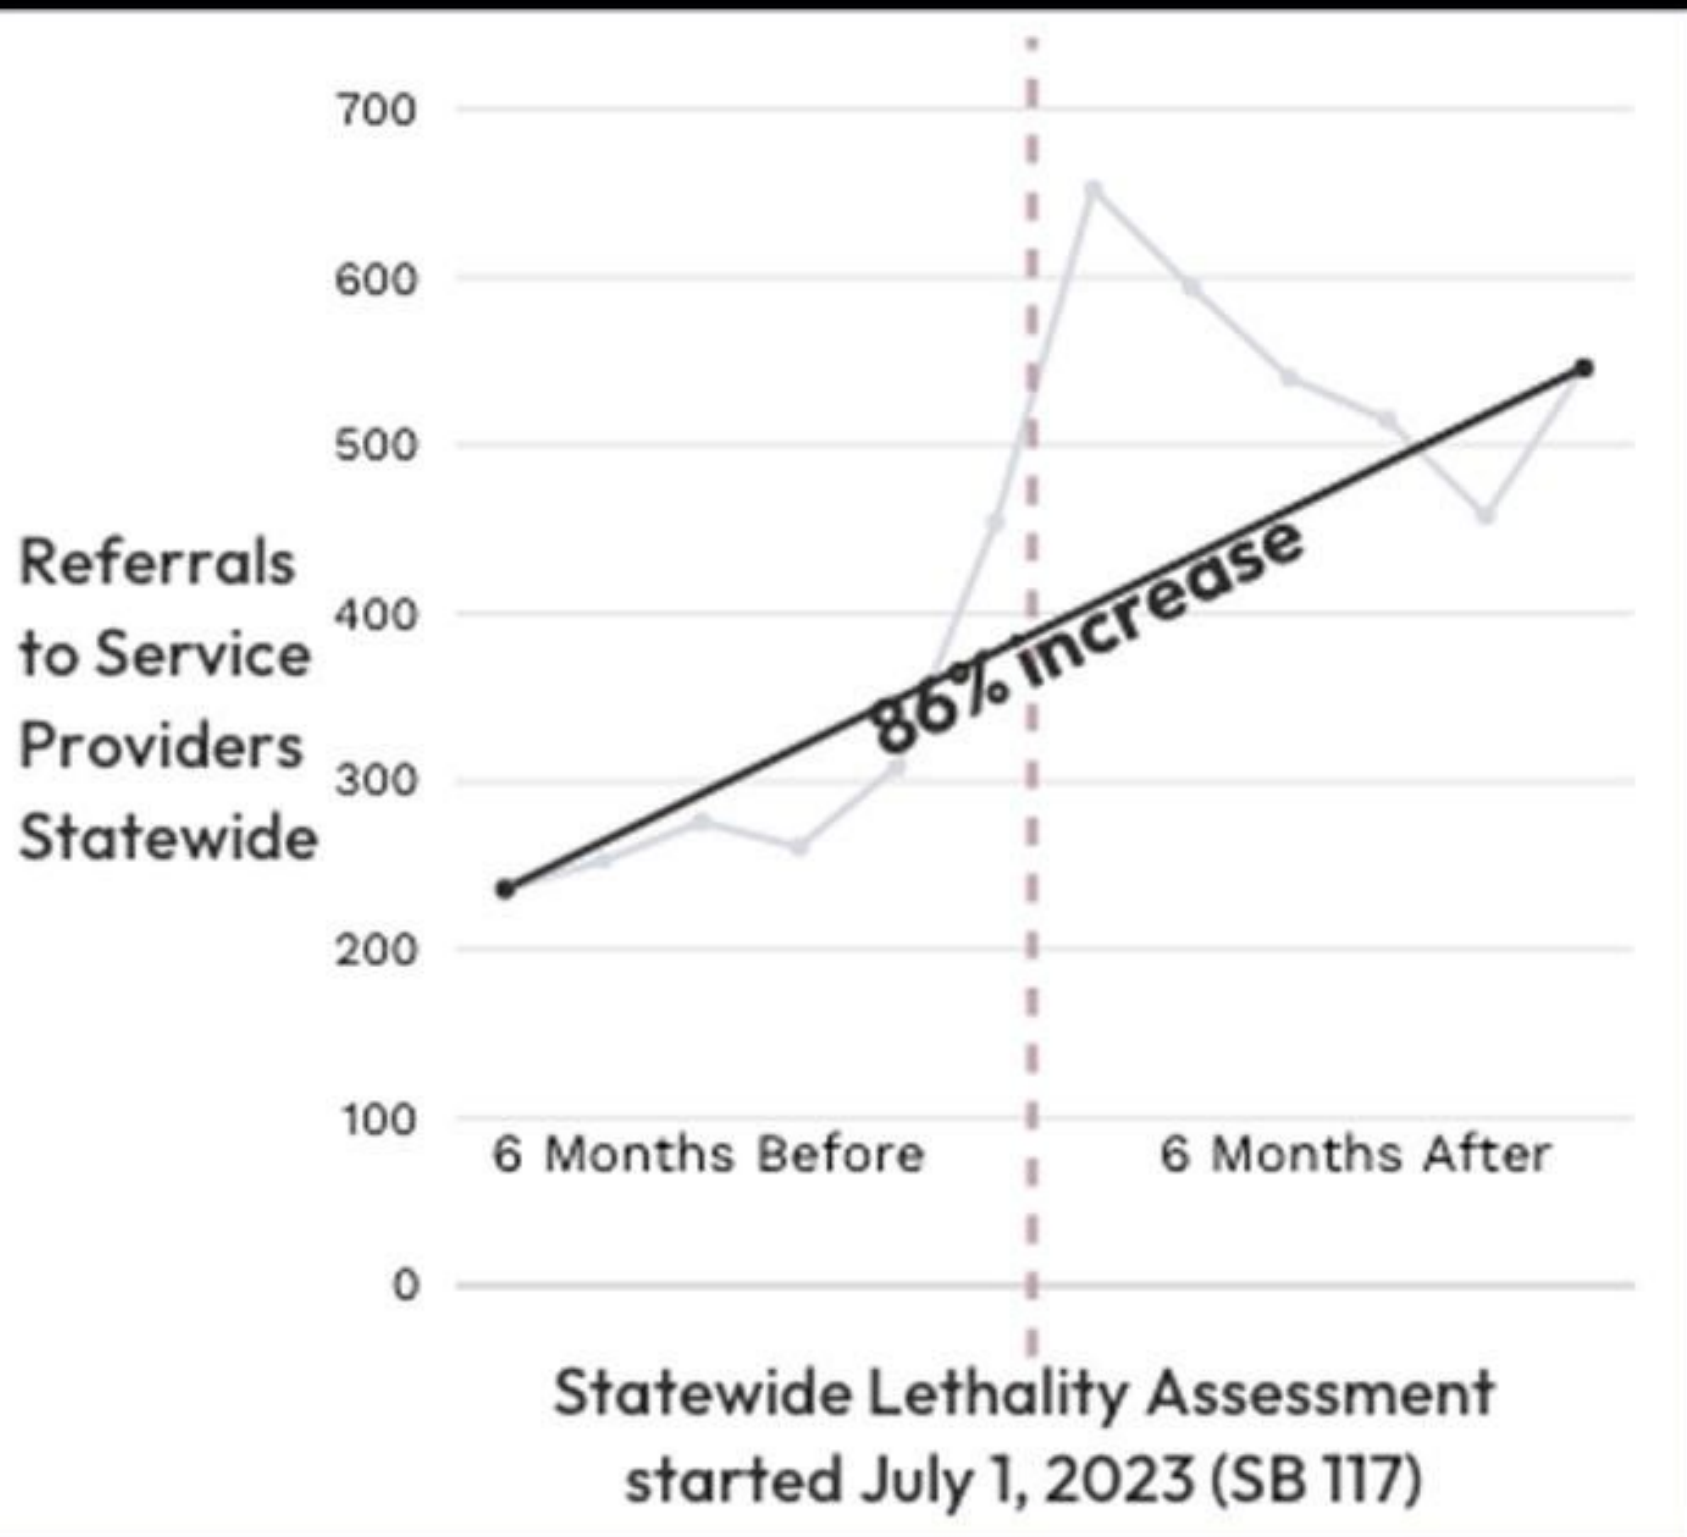

## Connect

Law Enforcement  
will connect the  
victim with a local  
domestic violence  
service provider

# Increase of Referrals to DV Service Providers Statewide

# Suspects with Prior LAPS

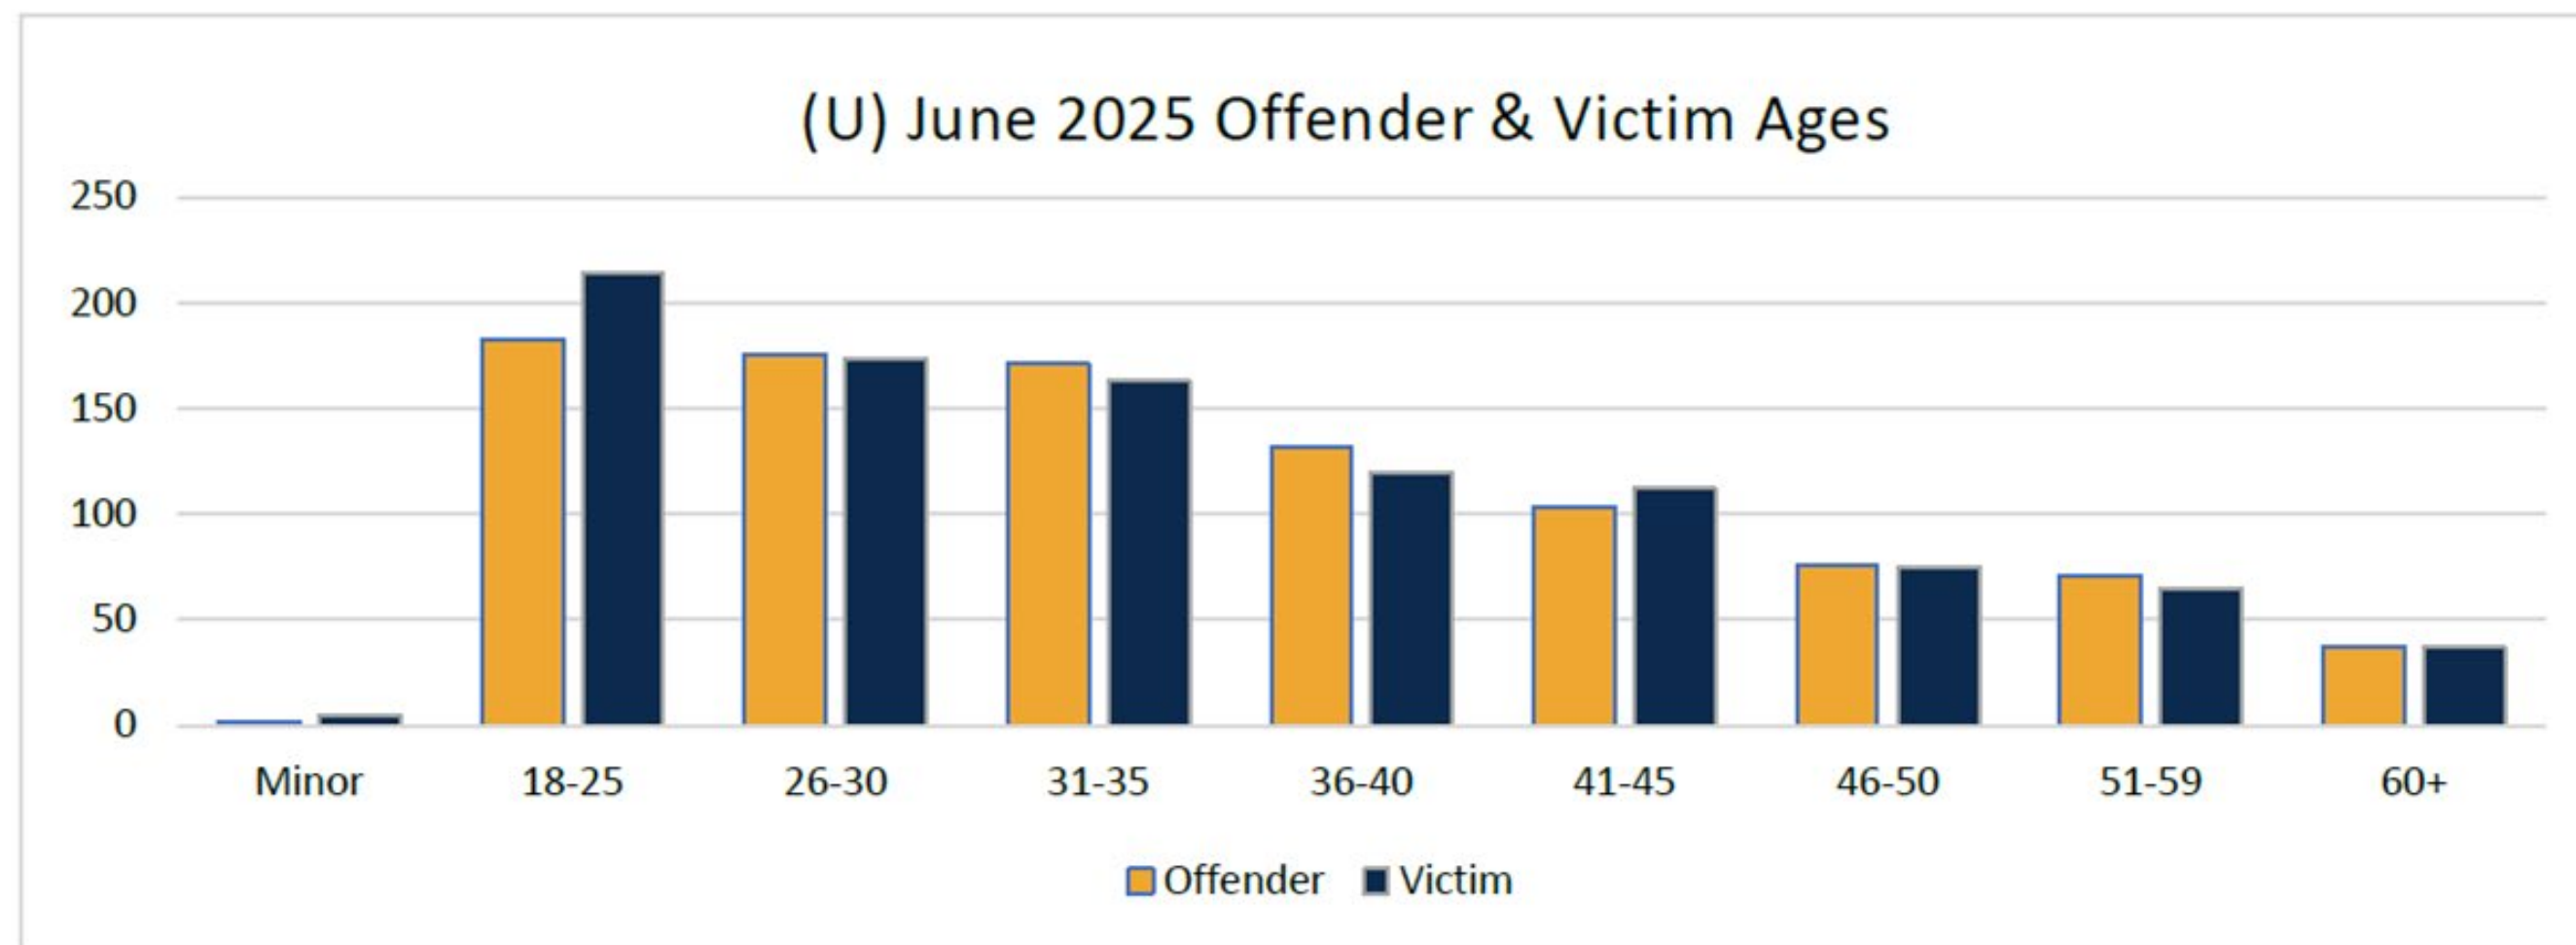

**The percentage of LAP suspects with prior LAP involvement (as a suspect or victim) has increased since the inception of the program (July 1, 2023)**

# LAP Victim Age Range

18 to 25 years old (18%) and 31 to 35 years old (18%) were the two most common age groups for **offenders**.

18 to 25 years old (21%) continues to be the most common age group for **victim**.

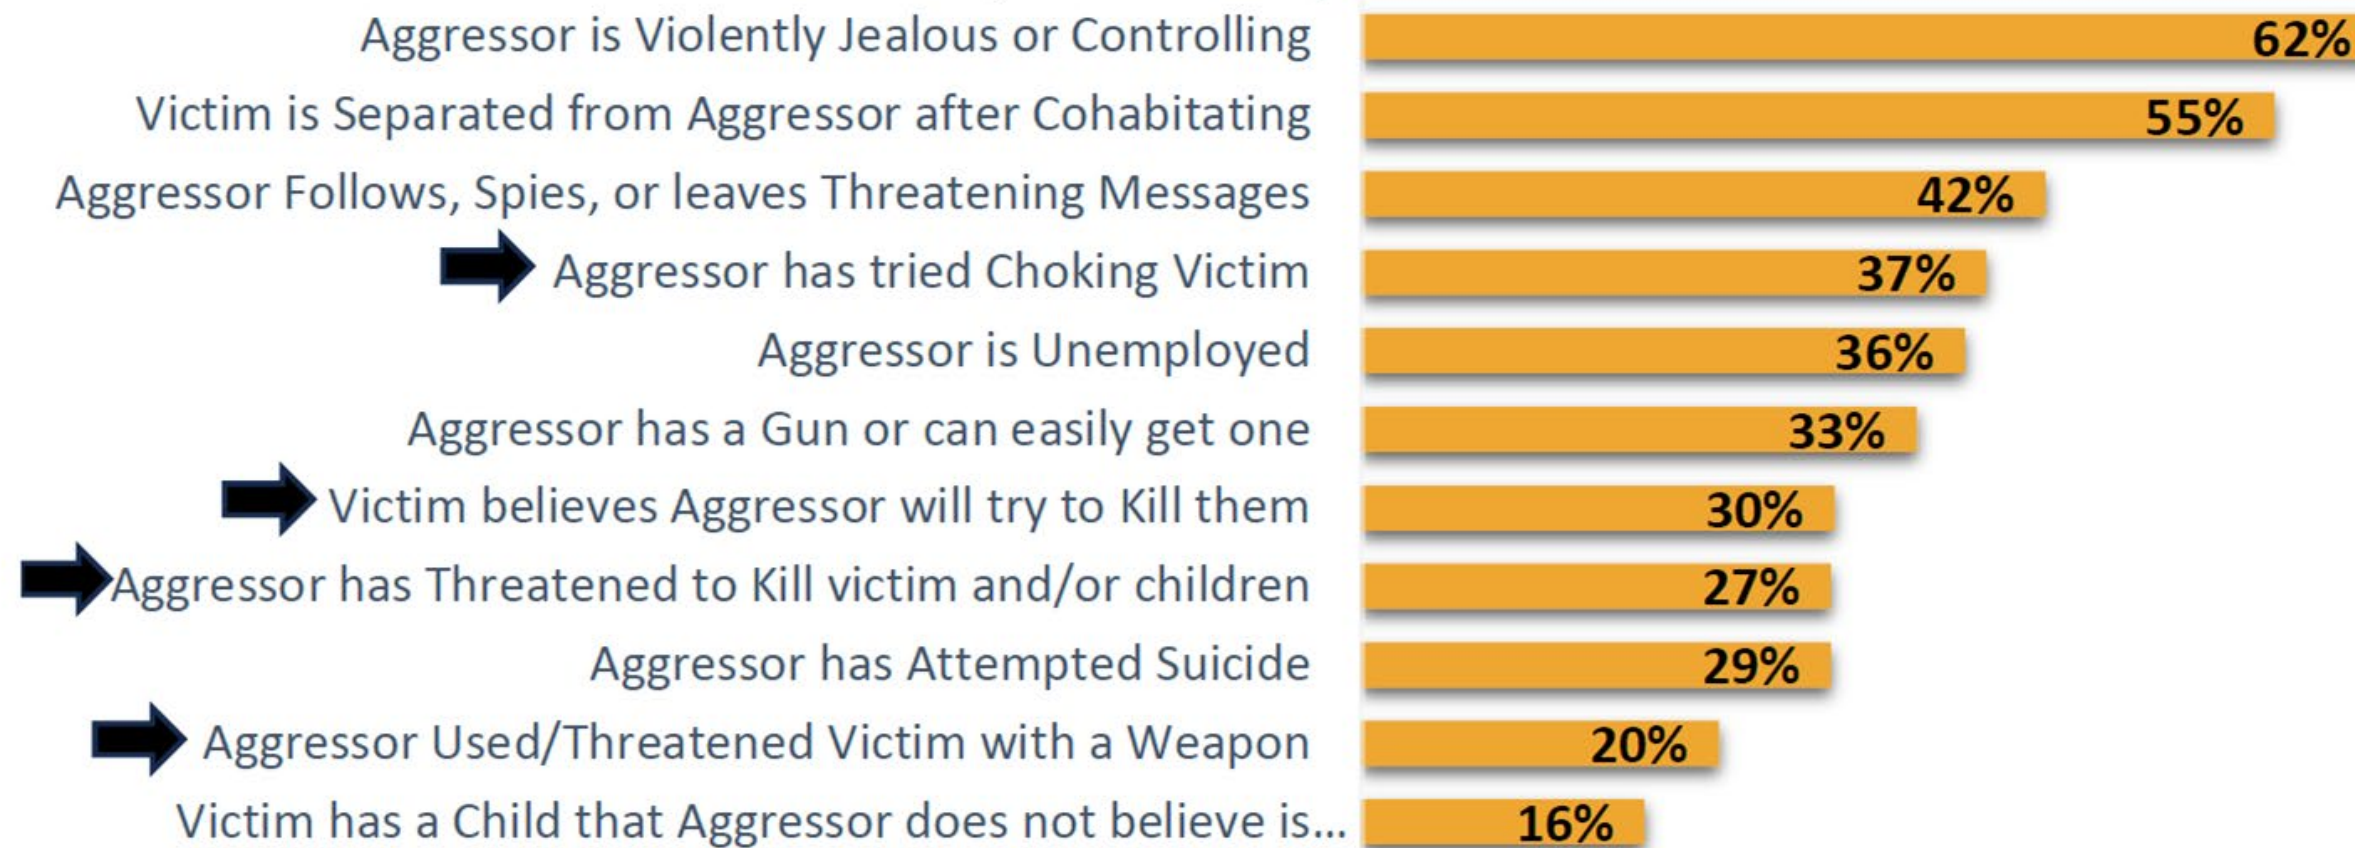

# LAP FREQUENCY

LAPs were most frequently submitted on Sunday mornings between midnight and 6 am.

**(U) June 2025 Yes Questionnaire Answers  
(out of 970)**

Per the questionnaire responses, victims most often reported that the aggressor is violently or constantly jealous, or controls most of the daily activities of the victim (62%). The second most common response is that the victim has left or is separated from the aggressor after cohabiting (55%). Affirmative answers to any of the questions with an arrow automatically designate the assessment as Potentially Lethal.

# Overview

## **Ontario Domestic Assault Risk Assessment (ODARA) (Hilton, 2021)**

- **Actuarial, DV-specific assessment (risk tool in intimate partner violence cases)**
- **Risk of offender recidivism within the next five years**
- **13 items (mix of dynamic and static)**
- **Higher scores=**
  - **Greater risk of new DV assaults**
  - **Shorter time between original offense and next assault**
  - **More likely to commit more severe and more frequent assaults**
- **Male defendants in a heterosexual relationship**
- **Female defendants in a heterosexual relationship**

# Comparing the ODARA & the LAP

## **ODARA (Hilton, 2024)**

- **Criminal justice tool**
- **Assesses risk of future abuse**
- **Seven standardized risk levels**
- **AUC = .77**
- **Cross validation AUC= .72**
- **High inter-rater reliability (when trained properly)**

## **LAP (Utah Intimate Partner Violence Lethality Assessment)**

- **Public health tool**
- **Assess lethality and connect with resources**
- **High Danger v. Low Danger (includes “gut decision for law enforcement) (Messing, Campbell, Wilson, Brown, & Patchell, 2017)**
- **High sensitivity (92% to 93%)**
- **Low specificity (21%)**

# Why Both Are Needed

ODARA Score	% Recidivism	% in this Range	% Scoring Lower	% Scoring Higher
0	7	9	0	91
1	17	17	9	74
2	22	21	26	53
3	34	20	47	33
4	39	13	67	20
5-6	53	14	80	6
7-13	74	6	94	0

ODARA  
Com  
defe

“How likely is my partner to assault again?”

ODARA score = 0: 5% of such wife assaulters commit another assault against their partner (or, in some cases, a future partner) that comes to the attention of the police, within an average of about 5 years.

ODARA score = 1: 10% of such wife assaulters commit another assault against their partner (or, in some cases, a future partner) that comes to the attention of the police, within an average of about 5 years.

ODARA score = 2: 20% of such wife assaulters commit another assault against their partner (or, in some cases, a future partner) that comes to the attention of the police, within an average of about 5 years.

ODARA score = 3: 30% of such wife assaulters commit another assault against their partner (or, in some cases, a future partner) that comes to the attention of the police, within an average of about 5 years.

ODARA score = 4: 40% of such wife assaulters commit another assault against their partner (or, in some cases, a future partner) that comes to the attention of the police, within an average of about 5 years.

ODARA score = 5-6: 60% of such wife assaulters commit another assault against their partner (or, in some cases, a future partner) that comes to the attention of the police, within an average of about 5 years.

ODARA score = 7-13: 70% of such wife assaulters commit another assault against their partner (or, in some cases, a future partner) that comes to the attention of the police, within an average of about 5 years.

# Potential Ways Forward

## Law Enforcement Rollout

### (most costly):

- Significant cost (requires additional capacity for LEOs)
- Only regional benefits with pilot program
- Heavy lift to train (4 hours to certify in addition to POST)

## Jail Rollout (some costs):

- Significant cost (requires additional capacity for jail staff)
- Only regional benefits with pilot program
- Significant, but smaller lift to train (29 counties)

## SIAC Rollout (least costly)

- Conducted by additional SIAC analysts
- Statewide benefits
- Standardized
- Lowest training burden
- Best cost-benefit ratio

# The Plan

- **Listening sessions with regional and state stakeholders**
- **Providing training about the ODARA**
- **Implementing during the sentencing process where possible (evaluate outcomes)**
- **Looking for funding and scalability options**
