HB179 SUPPORT - My Story - Raw Milk

From David Ninow <davidninow@gmail.com>

To Kristen Chevrier <kchevrier@le.utah.gov>

Hi Representative Chevrier,

Although I don't live in your district, I am a Utah resident. I support your bill.

I have been horribly allergic to milk and milk products since I was a baby. I didn't even have my first bowl of ice cream until I was 14, and my first glass of milk till I was 18 (neither was a pleasant experience). I also never like drinking milk alternatives like almond or coconut because they are usually chucked full of chemicals and preservatives.

But ever since I discovered raw milk a few years ago, not only can I drink glass upon glass with no issue whatsoever, I also feel great drinking it! Healthier, more energetic, etc. it's amazing. No allergic reactions, nothing. And I still react to "store-bought" milk even today.

The only problem is that because raw milk is currently so regulated, it costs \$13 a gallon wherever I can buy it in Utah and Salt Lake County. Deregulation always increases access and affordability.

If it helps, feel free to use my story to support your bill.

Thank you for your work on this!
