

Requester Information

Legislator Name: Weiler, Todd

Created Date: January 20th 2026Submitted Date: January 20th 2026

Section 1: Requester Details

Description:

This request builds on the 2025 "know-by-name" pilot by developing a coordinated case management approach for homeless individuals and testing it in two communities. Case management for those experiencing homelessness is essential and key to the success of Utah's efforts to address homelessness. However, current caseloads and capabilities among service providers present a significant barrier to meeting the case management needs of individuals experiencing and exiting homelessness. This funding request will create a differentiated and coordinated system using 211 service navigators to reduce case loads among service providers and address the critical need for continued follow up and support when people successfully exit shelter.
