## S.B. 169, High School Graduation Amendments

---

This bill requires local education agencies (LEAs) to let students participate in graduation activities if the LEA awards a diploma to the student, including students graduating from the LEA's online program. This includes graduation commencements, ceremonies, and honors ceremonies.

LEAs may prohibit a student from participating if there are significant safety concerns.

The Utah State Board of Education's rules and minimum standards for graduation must require LEAs to comply with these requirements.
