

## What SB 189 Does

- Targets districts responsible for 10% or more of statewide enrollment growth
- Uses objective, ADM-based formulas
- Funds growth-driven capital needs only:
  - Land for future schools
  - Transportation infrastructure
- Requires state oversight and reporting

## Why State Funding Matters

Growth is driven by statewide housing and economic forces, not local decisions.

Communities like Tooele, southern Utah County, Iron County, Grand County, and Brigham City are absorbing that growth.

SB 189 is targeted and accountable.

*State growth requires state investment.*
