
H.B. 303 - Phosphorus Limit in Dishwashing Detergent

Fiscal Note

2008 General Session

State of Utah

State Impact

Enactment of this bill will not require additional appropriations. This use of phosphorus is not currently a regulatory element of DEQ.

Individual, Business and/or Local Impact

Wastewater treatment facilities may benefit due to decreased levels of phosphorus entering into their collection systems. It is unknown at this time if individuals would be impacted with future dishwashing detergent purchases because of the new chemical requirements of the bill.
