UCA 36-12-13(2)(b)

This bill increases the cap for the maximum balance in the Oil and Gas Conservation Account. Funds in excess of the cap are deposited in the General Fund. In the short term while oil and gas prices are low, this legislation is not likely to reduce revenue to the General Fund. If oil and gas prices increase in the future, this legislation could allow more money to remain in the Oil and Gas Conservation Account versus going to the General Fund.

#### Notes on Notes

Fiscal notes estimate the direct costs or revenues of enacting a bill. The Legislature uses them to balance the budget. They do not measure a bill's benefits or non-fiscal impacts like opportunity costs, wait times, or inconvenience. A fiscal note is not an appropriation. The Legislature decides appropriations separately.
