Performance Note
SB0232 - Statewide Credentials and Certification Amendments
Sponsor: Sen. Owens, Derrin R.

Performance Note Report

Author: David Pulsipher
Agency: Utah Board of Higher Education

New Services or Benefit

Public Benefit:

Purpose: The program is designed to connect employees, employers, and education in order to facilitate the targeted training that employers require with the employees seeking a job. This platform will keep track of micro-credentials in an easy way for employers to connect with individuals who have those skills or for employers to connect with Snow College in order to develop that curriculum.

Services: Necessary resources would include the online platform, administration of the program by Snow College, and a pool of available grant funds.

Expected Outcome: This program would create greater economic development and accessibility to additional postsecondary education and training.

Implementations and Resources: It is estimated that $300,000 would be needed for contract costs, personnel costs, and the remainder would be included in the grant fund pool.

How: This new program would increase employment opportunities, especially in rural Utah.

Performance Measures

Goal

Title: Program goals include: reducing unemployment, increasing education rates, and improving the overall quality of life.

Description: Program goals include: reducing unemployment, increasing education rates, and improving the overall quality of life.

Collection Method: Since this new program would be a partnership with employers, the number of training sessions provided, the placement of 'graduates,' and the satisfaction of the training sessions will be data elements that would be evaluated.
