

**57-10-5 Descriptions of tracts extending over more than one zone.**

- (1) When any tract of land that is to be defined by a single land description extends from one into another of the coordinate zones, the positions of all points on its boundaries may be referred to by either of the two zones.
- (2) The zone that is used shall be identified specifically in the land description.

Repealed and Re-enacted by Chapter 60, 1988 General Session
