

**65A-8a-105 Division to promote implementation of Forest Water Quality Guidelines.**

- (1) The division shall promote implementation of Forest Water Quality Guidelines before, during, and after the conduct of forest practices on forested land in order to:
  - (a) preserve water quality and soil stability;
  - (b) prevent the hazard of fire and insect infestation;
  - (c) minimize waste of timber resources; and
  - (d) protect the regenerative and productive capacity of forested land.
- (2) The division, in cooperation with Utah State University Extension Services:
  - (a) shall implement a program to develop demonstration areas, books, brochures, informational material, seminars and workshops, and other aids to display correct application of the Forest Water Quality Guidelines; and
  - (b) may aid private landowners by providing technical assistance to landowners and operators in implementing Forest Water Quality Guidelines.

Enacted by Chapter 80, 2001 General Session
