2	ENERGY EFFICIENCY AND UTILITY
3	DEMAND-SIDE MANAGEMENT
4	2009 GENERAL SESSION
5	STATE OF UTAH
6	Chief Sponsor: Roger E. Barrus
7	Senate Sponsor:
8	
9	LONG TITLE
10	General Description:
11	This joint resolution of the Legislature urges state and local governments, electric and
12	natural gas utilities, and Utah's Public Service Commission to work to increase cost-
13	effective and energy efficient utility services.
14	Highlighted Provisions:
15	This resolution:
16	 urges state and local governments, electric and natural gas utilities, and municipal
17	utilities to work together to promote and encourage cost-effective energy efficiency
18	and conservation;
19	 urges that state and local government and local and municipal utility programs be as
20	cost effective and energy efficient as is technically and economically feasible;

JOINT RESOLUTION ON COST-EFFECTIVE

interested parties to identify and, where appropriate, approve cost-effective energy

efficiency and load management programs designed to reduce projected electric

usage by not less than 1% of the utility's annual retail sales;

urges the Public Service Commission to work with electric utilities and other

28	0.5% of the utility's annual sales;
29	 urges the Public Service Commission to ensure that electric and natural gas utilities
30	recover expenses incurred in promoting and making available energy efficiency and
31	local management programs and that they are not penalized financially if their
32	programs fail to meet the saving goals approved by the Commission;
33	 urges the Public Service Commission to approve regulatory mechanisms that
34	remove utility disincentives to efficiency and conservation and enable utilities to
35	recover reasonable fixed costs; and
36	 urges the Public Service Commission to allow electric and natural gas corporations
37	to earn a profit on their investments in cost-effective energy efficiency and load
38	management programs, with the level of profit tied to an indicator of program
39	performance.
40	Special Clauses:
41	None
42	
43	Be it resolved by the Legislature of the state of Utah:

58

energy efficiency measures;

01-27-09 8:56 AM H.J.R. 9

WHEREAS, the Public Service Commission, in consultation with electric utilities and other interested parties, should identify and, where appropriate, approve cost-effective energy efficiency programs that are designed to reduce projected electric and natural gas usage;

WHEREAS, the Public Service Commission should ensure that electric and natural gas utilities recover the expenses incurred in promoting and making available energy efficiency and local management programs and that they are not penalized financially if programs fail to meet the saving goals approved by the Commission;

WHEREAS, electric and natural gas utilities should not be penalized financially by providing consumers and businesses with access to information and programs which increase their energy efficiency and reduce their utility bills;

WHEREAS, the Public Service Commission should ensure that utilities are not penalized financially when they help their customers save money;

WHEREAS, the Public Service Commission should approve regulatory mechanisms that remove utility disincentives to efficiency and conservation and enable utilities to recover reasonable fixed costs; and

WHEREAS, the Public Service Commission should allow electric and natural gas utilities to earn a profit on their investments in cost-effective energy efficiency and load management programs, with the level of profit tied to a reliable indicator of program performance:

NOW, THEREFORE, BE IT RESOLVED that the Legislature of the state of Utah urges state and local governments, electric and natural gas utilities, and municipal utilities to work together to promote and encourage cost-effective energy efficiency and conservation.

BE IT FURTHER RESOLVED that the Legislature urges that state and local government and local and municipal utility programs be as cost effective and energy efficient as is technically and economically feasible.

BE IT FURTHER RESOLVED that the Legislature urges the Public Service Commission, in consultation with electric utilities and other interested parties, to identify and, where appropriate, approve cost-effective energy efficiency and load management programs for customers, with the programs designed to reduce projected electric usage by an amount equal to not less than 1% of the utility's annual retail sales.

BE IT FURTHER RESOLVED that the Legislature urges the Public Service

Commission, in consultation with natural gas utilities and other interested parties, to identify
and, where appropriate, approve cost-effective energy efficiency programs that are designed to
reduce projected natural gas usage by customers by an amount equal to not less than 0.5% of
the utility's annual sales.

BE IT FURTHER RESOLVED that the Legislature urges the Public Service Commission to ensure that electric and natural gas utilities recover the expenses incurred in promoting and making available energy efficiency and local management programs and that they are not penalized financially if programs fail to meet the saving goals approved by the Public Service Commission.

BE IT FURTHER RESOLVED that the Legislature urges that the Public Service Commission ensure that utilities are not penalized financially when they help their customers save money.

BE IT FURTHER RESOLVED that the Legislature urges the Public Service Commission to approve regulatory mechanisms, including performance-based incentives, decoupling fixed cost recovery from sales volume, and other innovative rate designs that remove utility disincentives to efficiency and conservation and enable utilities to recover reasonable fixed costs.

BE IT FURTHER RESOLVED that the Legislature urges the Public Service Commission to allow electric and natural gas utilities to earn a profit on their investments in cost-effective energy efficiency and load management programs, with the level of profit tied to the level of energy savings achieved, the net economic benefits provided by the energy efficiency and local management programs, or some other indicator of program performance.

BE IT FURTHER RESOLVED that a copy of this resolution be sent to the Public Service Commission, the Utah League of Cities and Towns, the Utah Association of Counties, and the electrical and natural gas utilities operating in the state of Utah.

H.J.R. 9 - Joint Resolution on Cost-effective Energy Efficiency and Utility Demand-side Management

2009 General Session State of Utah

State Impact

Enactment of this bill will not require additional appropriations.

Individual, Business and/or Local Impact

Enactment of this bill likely will not result in direct, measurable costs and/or benefits for individuals, businesses, or local governments.
