310 (c) If the change applicant and all protestants to the change application who have
311 asserted issues of forfeiture or abandonment and are aggrieved persons agree in writing to

328 (b) agree in writing with the change applicant to allow the state engineer to determine
329 the quantity of water available for change under Subsections (14) and (15).

330 (7) If an aggrieved person protests a change application, the change applicant or the
331 protestant may stay the change application process and toll the filing time described in
332 Subsection (6)(a)(ii)(A) by requesting an advisory opinion under Subsection 13-43-205(2)
333 before filing an action under Subsection (6)(a)(ii)(A).

334 (8) A request for an advisory opinion in accordance with Subsection (7) tolls a filing
335 time described in Subsection (6)(a)(ii)(A) until 30 days after the day on which:

336 (a) the advisory opinion is issued; or

337 (b) the participants have submitted a written request to withdraw the request for the
338 advisory opinion.

339 (9) (a) Within 10 days after the day on which the state engineer receives the notice of

345 conclusory remarks.

346 (10) A person may not bring a forfeiture or abandonment action against a water right

348 application and files the action in accordance with Subsection (6).

349 (11) Within 70 days after the last day on which a person may file a protest to a change
350 application under Subsection 73-3-7(1)(a), 60 days after the last day on which a person may file
351 a protest to a change application under Subsection 73-3-7(1)(b), or 10 days after the last day on
352 which a person may file a protest to a change application under Subsection 73-3-7(1)(c), the
353 state engineer shall deliver or make available to the change applicant and each protestant all
354 existing evidence from the state engineer's records regarding:

355 (a) beneficial use of the underlying water right;

356 (b) lack of beneficial use of the underlying water right; and

357 (c) all approved nonuse applications.

358 (12) In an action filed under Subsection (6)(a)(ii)(A) or for an advisory opinion
359 requested under Subsection (7):

360 (a) the person who protests the quantity of water available for change shall bear the
361 burden of proof to show that the underlying water right has been fully or partially abandoned or
362 forfeited; and

363 (b) the state engineer may not be included as a party.

364 (13) If the change application procedure is stayed under Subsection (6) for a change
365 application, when the parties make a settlement agreement or the court issues a final order, the
366 state engineer shall complete the change application procedure under Sections 73-3-3 and

367 73-3-8 using the quantity of water available for change.

368 (14) (a) If the change applicant and all protestants to the change application who are
369 aggrieved persons agree in writing to allow the state engineer to determine the quantity of
370 water available for change under a change application, the state engineer shall review the
371 beneficial use of the water under the water right and determine the quantity of water available
372 for change.

373 (b) In reviewing the beneficial use of the water under Subsection (14)(a), the state
374 engineer shall, if the water right is exempted or protected under Section 73-1-4 or other law,
375 consider the water reasonably applied to beneficial use.

376 (15) (a) In reviewing the beneficial use of water and determining the quantity of water
377 available for change under Subsection (14)(a), the state engineer shall:

378 (i) presume that the full amount of water indicated in the water right is available for the
379 change, unless the presumption is rebutted by clear and convincing evidence that demonstrates
380 that a smaller quantity of water is available for the change;

381 (ii) if the state engineer or a protestant to the change application questions the quantity
382 of water available for change, conduct an administrative hearing where the change applicant
383 and any protestant may present evidence regarding the quantity of water available for change;
384 and

808 (c) The specified section of the natural or altered stream channel for the instream flow
809 may not be further upstream than the water right's original point of diversion nor extend further
810 downstream than the next physical point of diversion made by another person.

811 (d) (i) The fishing group shall receive the Division of Wildlife Resources' director's
812 approval of the proposed change before filing the fixed time change application with the state
813 engineer.

814 (ii) The director may approve the proposed change if:

816 listed in Subsections (3)(a)(i) through (iii);

817 (B) the proposed purpose of use is consistent with an existing state management or
818 recovery plan for that specie; and

819 (C) the water right owner has received a certificate of inclusion from a person who has:

820 (I) entered into a programmatic Candidate Conservation Agreement with Assurances
821 with the United States Fish and Wildlife Service, as authorized by 16 U.S.C. Sec. 1531(a)(5)

828 same procedures as provided in this title for an application to appropriate water.

829 (ii) The rights and the duties of a fixed time change applicant are the same as provided
830 in this title for an applicant to appropriate water.

831 (f) A fishing group may refile a fixed time change application by filing a written

832 request with the state engineer no later than 60 days before the application expires.

833 (g) (i) The water right for which the state engineer has approved a fixed time change

835 existed before the approved fixed time change application when the fixed time change
836 application expires or is terminated.

837 (ii) The applicant shall give written notice to the state engineer and the lessor, if
838 applicable, if the applicant wishes to terminate a fixed time change application before the fixed
839 time change application expires.

840 (4) In addition to the requirements of [~~Subsection~~] Section 73-3-3[~~(4)~~(b)], an
841 application authorized by this section shall:

842 (a) set forth the legal description of the points on the stream channel between which the
843 instream flow will be provided by the change application; and

844 (b) include appropriate studies, reports, or other information required by the state
845 engineer demonstrating the necessity for the instream flow in the specified section of the
846 stream and the projected benefits to the public resulting from the change.

847 (5) (a) For a permanent change application or a fixed time change application filed
848 according to this section, 60 days before the date on which proof of change for an instream
849 flow is due, the state engineer shall notify the applicant by mail or by any form of
850 communication through which receipt is verifiable of the date when proof of change is due.

851 (b) Before the date when proof of change is due, the applicant must either:

852 (i) file a verified statement with the state engineer that the instream flow uses have
853 been perfected, setting forth:

854 (A) the legal description of the points on the stream channel between which the
855 instream flow is provided;

856 (B) detailed measurements of the flow of water in second-feet changed;

868 (8) A physical structure or physical diversion from the stream is not required to
869 implement a change for instream flow use.

870 (9) This section does not allow enlargement of the water right that the applicant seeks
871 to change.

872 (10) A change application authorized by this section may not impair a vested water
873 right, including a water right used to generate hydroelectric power.

874 (11) The state engineer or the water commissioner shall distribute water under an
875 approved or a certificated instream flow change application according to the change
876 application's priority date relative to the other water rights located within the stream section
877 specified in the change application for instream flow.

878 (12) An approved fixed time change application does not create a right of access across
879 private property or allow any infringement of a private property right.
