467 ~~[(23)]~~ (22) "Wilderness" is as defined in 16 U.S.C. Sec. 1131.

468 ~~[(24)]~~ (23) "Wilderness area" means those BLM and Forest Service lands added to the  
469 National Wilderness Preservation System by an act of Congress.

470 ~~[(25)]~~ (24) "Wilderness Preservation System" means the Wilderness Preservation  
471 System established in 16 U.S.C. Sec. 1131 et seq.

472 ~~[(26)]~~ (25) "WSA" and "Wilderness Study Area" mean the BLM lands in Utah that  
473 were identified as having the necessary wilderness character and were classified as wilderness  
474 study areas during the BLM wilderness review conducted between 1976 and 1993 by authority  
475 of 43 U.S.C. Sec. 1782 and labeled as Wilderness Study Areas within the final report of the  
476 President of the United States to the United States Congress in 1993.

477 Section 2. Section **63J-8-105** is amended to read:

478 **63J-8-105. Maps available for public review.**

479 A printed copy of the maps referenced in Subsections **63J-8-102**~~[(5), (9), (21), and~~  
480 ~~(22)]~~(8), (20), and (21) shall be available for inspection by the public at the offices of the Utah  
481 Association of Counties.

482 Section 3. Section **63J-8-105.5** is amended to read:

483 **63J-8-105.5. Uintah Basin Energy Zone established -- Findings -- Management**  
484 **and land use priorities.**

485 (1) There is established the Uintah Basin Energy Zone in Daggett, Uintah, and  
486 Duchesne Counties for the purpose of maximizing efficient and responsible development of  
487 energy and mineral resources.

488 (2) The land area and boundaries of the Uintah Basin Energy Zone are described in  
489 Subsection **63J-8-102**~~[(22)]~~(21) and illustrated on the map described in Section **63J-8-105**.

490 (3) The state finds that:

491 (a) the lands comprising the Uintah Basin Energy Zone contain abundant, world-class  
492 deposits of energy and mineral resources, including oil, natural gas, oil shale, oil sands,  
493 gilsonite, coal, phosphate, gold, uranium, and copper, as well as areas with high wind and solar  
494 energy potential; and

495 (b) the highest management priority for all lands within the Uintah Basin Energy Zone  
496 is responsible management and development of existing energy and mineral resources in order  
497 to provide long-term domestic energy and supplies for Utah and the United States.

498 (4) The state supports:

499 (a) efficient and responsible full development of all existing energy and mineral  
500 resources located within the Uintah Basin Energy Zone, including oil, oil shale, natural gas, oil  
501 sands, gilsonite, phosphate, gold, uranium, copper, solar, and wind resources; and

502 (b) a cooperative management approach among federal agencies, state, and local  
503 governments to achieve broadly supported management plans for the full development of all  
504 energy and mineral resources within the Uintah Basin Energy Zone.

505 (5) The state calls upon the federal agencies who administer lands within the Uintah  
506 Basin Energy Zone to:

507 (a) fully cooperate and coordinate with the state and with Daggett, Uintah, and  
508 Duchesne Counties to develop, amend, and implement land and resource management plans  
509 and to implement management decisions that are consistent with the purposes, goals, and  
510 policies described in this section to the maximum extent allowed under federal law;

511 (b) expedite the processing, granting, and streamlining of mineral and energy leases  
512 and applications to drill, extract, and otherwise develop all existing energy and mineral  
513 resources located within the Uintah Basin Energy Zone, including oil, natural gas, oil shale, oil  
514 sands, gilsonite, phosphate, gold, uranium, copper, solar, and wind resources;

515 (c) allow continued maintenance and increased development of roads, power lines,  
516 pipeline infrastructure, and other utilities necessary to achieve the goals, purposes, and policies  
517 described in this section;

518 (d) refrain from any planning decisions and management actions that will undermine,  
519 restrict, or diminish the goals, purposes, and policies for the Uintah Basin Energy Zone as  
520 stated in this section; and

521 (e) refrain from implementing a policy that is contrary to the goals and purposes

522 described within this section.

523 (6) The state calls upon Congress to establish an intergovernmental standing  
524 commission among federal, state, and local governments to guide and control planning  
525 decisions and management actions in the Uintah Basin Energy Zone in order to achieve and  
526 maintain the goals, purposes, and policies described in this section.

527 (7) Notwithstanding the provisions of this section, the state's grazing and livestock  
528 policies and plans on land within the Uintah Basin Energy Zone shall continue to be governed  
529 by Sections [63J-4-401](#) and [63J-8-104](#).

530 Section 4. Section **63J-8-105.7** is amended to read:

531 **63J-8-105.7. Green River Energy Zone established -- Findings -- Management**  
532 **and land use priorities.**

533 (1) There is established the Green River Energy Zone in Carbon and Emery Counties  
534 for the purpose of maximizing efficient and responsible development of energy and mineral  
535 resources.

536 (2) The land area and boundaries of the Green River Energy Zone are described in  
537 Subsection [63J-8-102](#)~~(9)~~(8) and illustrated on the maps described in Section [63J-8-105](#).

538 (3) The state finds that:

539 (a) the lands comprising the Green River Energy Zone contain abundant world-class  
540 deposits of energy and mineral resources, including oil, natural gas, oil shale, oil sands,  
541 gilsonite, coal, phosphate, gold, uranium, and copper, as well as areas with high wind and solar  
542 energy potential;

543 (b) for lands within the Carbon County portion of the Green River Energy Zone, the  
544 highest management priority is the responsible management, development, and extraction of  
545 existing energy and mineral resources in order to provide long-term domestic energy and  
546 supplies for Utah and the United States; and

547 (c) for lands within the Emery County portion of the Green River Energy Zone:

548 (i) the responsible management and development of existing energy and mineral  
549 resources in order to provide long-term domestic energy and supplies for Utah and the United  
550 States is a high management priority; and

551 (ii) the management priority described in Subsection (3)(c)(i) should be balanced with  
552 the following high management priorities:

- 553 (A) watershed health;
- 554 (B) water storage and water delivery systems;
- 555 (C) Emery County Heritage Sites;
- 556 (D) facilities and resources associated with the domestic livestock industry;
- 557 (E) wildlife and wildlife habitat; and
- 558 (F) recreation opportunities.
- 559 (4) The state supports:
- 560 (a) efficient and responsible full development of all existing energy and mineral
- 561 resources located within the Green River Energy Zone, including oil, oil shale, natural gas, oil
- 562 sands, gilsonite, coal, phosphate, gold, uranium, copper, solar, and wind resources; and
- 563 (b) a cooperative management approach by federal agencies, the state of Utah, and
- 564 local governments to achieve broadly supported management plans for the full development of
- 565 all energy and mineral resources within the Green River Energy Zone.
- 566 (5) The state requests that the federal agencies that administer lands within the Green
- 567 River Energy Zone:
- 568 (a) fully cooperate and coordinate with the state of Utah and with Carbon and Emery
- 569 Counties to develop, amend, and implement land and resource management plans and to
- 570 implement management decisions that are consistent with the purposes, goals, and policies
- 571 described in this section to the maximum extent allowed under federal law;

959 (3) Printed copies of the maps referenced in Subsection (2) shall be available for  
960 inspection by the public at the offices of the Utah Association of Counties.

961 (4) The state finds with respect to the grazing zones described in Subsection (2) that:

962 (a) agricultural livestock industry on the lands comprising these zones has provided a  
963 significant contribution to the history, customs, culture, economy, welfare, and other values of  
964 each area for more than 100 years;

965 (b) the potential for abundant natural and vegetative resources exist within these zones  
966 if managed properly, that will support and expand continued, responsible agricultural livestock  
967 activities and wildlife habitat;

968 (c) agricultural livestock activities in these zones and the associated historic resources,  
969 human history, shaping of human endeavors, variety of cultural resources, landmarks,  
970 structures, and other objects of historic or scientific interest are worthy of recognition,  
971 preservation, and protection;

972 (d) (i) the highest management priority for lands within these zones is the preservation,  
973 restoration, and enhancement of watershed and rangeland health to sustain and expand forage  
974 production for both livestock grazing and wildlife habitat, and the restoration and development  
975 of historic, existing, and future livestock grazing and wildlife habitat resources in order to  
976 provide protection for the resources, objects, customs, culture, and values identified above; and

977 (ii) notwithstanding Subsection (4)(d)(i), if part or all of any zone lies within a sage  
978 grouse management area, then the management priorities for such part shall be consistent with  
979 the management priorities set forth in Subsection (4)(d)(i) to the maximum extent consistent  
980 with the management priorities of the sage grouse management area;

981 (e) subject to Subsection (4)(d)(ii), responsible development of any deposits of energy  
982 and mineral resources, including oil, natural gas, oil shale, oil sands, coal, phosphate, gold,  
983 uranium, and copper, as well as areas with wind and solar energy potential, that may exist in  
984 these zones is compatible with the management priorities of Subsection (4)(d)(i) in these  
985 zones; and

986 (f) subject to Subsection (4)(d)(ii), responsible development of any recreation

987 resources, including roads, campgrounds, water resources, trails, OHV use, sightseeing,  
988 canyoneering, hunting, fishing, trapping, and hiking resources that may exist in these grazing  
989 zones is compatible with the management priorities of Subsection (4)(d)(i) in these grazing  
990 zones.

991 (5) The state finds with respect to the zones described in Subsection (2) that the  
992 historic levels of livestock grazing activity and other values identified in Subsection (4) in each  
993 zone have greatly diminished, or are under other serious threat, due to:

994 (a) unreasonable, arbitrary, and unlawfully restrictive federal management policies,  
995 including:

996 (i) de facto managing for wilderness in nonwilderness areas and non-WSAs;

997 (ii) ignoring the chiefly valuable for grazing designation of the Secretary of the Interior  
998 applicable to each of these zones; and

999 (iii) the arbitrary administrative reductions in animal unit months of permitted forage;

1000 (b) inflexible federal grazing practices that disallow grazing at different times each year  
1001 proven to be most effective for maintaining and enhancing rangeland conditions;

1002 (c) mismanagement of wild horses and burros resulting in competition for forage by  
1003 excess and mismanaged populations of wild horses and burros in Beaver and Emery counties;

1004 (d) improper management of vegetation resulting in the overgrowth of pinion, invasive  
1005 species, and juniper, and other woody vegetation that:

1006 (i) compromise watershed and rangeland health;

1007 (ii) crowd out grazing forage;

1008 (iii) degrade habitat and limit wildlife populations;

1009 (iv) reduce water yield; and

1010 (v) heighten the risk of catastrophic wildfire; and

1011 (e) other practices which degrade overall rangeland health.

1012 (6) To protect and preserve against the threats described in Subsection (5), the state  
1013 supports the following with respect to the zones described in Subsection (2):

1014 (a) efficient and sustained policies, programs, and practices directed at preserving,  
1015 restoring, and enhancing watershed and rangeland health to maximize:

1016 (i) all permitted forage production for livestock grazing and other compatible uses,

1017 including flexible grazing on and off dates adaptive to yearly climate and range conditions; and

1018           (ii) forage for fish and wildlife;  
1019           (b) a cooperative management approach by federal agencies, the state, and local  
1020 government agencies to achieve broadly supported management plans for the full development  
1021 of:  
1022           (i) forage resources for grazing livestock and wildlife; and  
1023           (ii) other uses compatible with livestock grazing and wildlife utilization;  
1024           (c) effective and responsible management of wild horses and burros to eliminate excess  
1025 populations; and  
1026           (d) effective and responsible management of wildlife habitat.  
1027           (7) The state requests that the federal agencies that administer lands within each  
1028 grazing zone:  
1029           (a) fully cooperate and coordinate with the state and the respective counties within  
1030 which each grazing zone is situated, to develop, amend, and implement land and resource  
1031 management plans, and implement management decisions that are consistent with the  
1032 purposes, goals, and policies described in this section to the maximum extent allowed under  
1033 federal law;  
1034           (b) expedite the processing, granting, and streamlining of grazing permits, range  
1035 improvements, and applications to enhance and otherwise develop all existing and permitted  
1036 grazing resources located within each grazing zone, including renewable vegetative resources;  
1037           (c) allow continued maintenance and increased development of roads, power lines,  
1038 pipeline infrastructure, and other utilities necessary to achieve the goals, purposes, and policies  
1039 described in this section and consistent with multiple use and sustained yield principles;  
1040           (d) refrain from any planning decisions and management actions that will undermine,  
1041 restrict, or diminish the goals, purposes, and policies for each grazing zone as stated in this  
1042 section; and  
1043           (e) subject to Subsection (4)(d)(ii), refrain from implementing a policy that is contrary  
1044 to the goals and purposes described within this section.  
1045           (8) (a) The state recognizes the importance of all grazing districts on Utah BLM and  
1046 Forest Service lands but establishes the grazing zones described in Subsection (2) to provide  
1047 special protection and preservation against the identified threats found in Subsection (5) to  
1048 exist in these zones.

1049 (b) It is the intent of the state to designate additional grazing agricultural commodity  
1050 zones in future years, if circumstances warrant special protection and preservation for new  
1051 zones.

1052 (9) The state calls upon applicable federal, state, and local agencies to coordinate with  
1053 each other and establish applicable intergovernmental standing commissions, with membership  
1054 consisting of representatives from the United States government, the state, and local  
1055 governments to coordinate and achieve consistency in planning decisions and management  
1056 actions in zones described in Subsection (2) in order to achieve the goals, purposes, and  
1057 policies described in this section.

1058 (10) Notwithstanding the provisions of this section, and subject to Subsection  
1059 (4)(d)(ii), the state's mineral, oil, gas, and energy policies and plans on land within the zones  
1060 described in Subsection (2) shall be governed by Sections [63J-4-401](#) and [63J-8-104](#).

1061 Section 6. Section **63J-8-105.9** is enacted to read:

1062 **63J-8-105.9. Utah Timber Agricultural Commodity Zones established -- Findings**  
1063 **-- Management and land use priorities.**

1064 (1) There are established and designated Utah Timber Agricultural Commodity Zones  
1065 for the purpose of:

1066 (a) preserving and protecting the agricultural timber, logging, and forest products  
1067 industry within these zones from ongoing threats;

1068 (b) preserving and protecting the significant history, culture, customs, and economic  
1069 value of the agricultural timber, logging, and forest products industry within these zones from  
1070 ongoing threats; and

1071 (c) maximizing efficient and responsible restoration, reclamation, preservation,  
1072 enhancement, and development of timber, logging, and forest products and affected natural,  
1073 historical, and cultural activities within these zones, in order to protect and preserve these  
1074 zones from ongoing threats.

1075 (2) The titles, land area, and boundaries of these zones are described as follows:

1076 (a) "Tushar Mountain Region Timber Zone," the land area of which consists of certain  
1077 Forest Service lands in the following townships in Beaver County, as more fully illustrated in  
1078 the map jointly prepared by the Beaver and Piute County GIS Departments in February 2014,  
1079 entitled "Tushar Mountain Region Timber Zone":

1153 (3) Printed copies of the maps referenced in Subsection (2) shall be available for  
1154 inspection by the public at the offices of the Utah Association of Counties.

1155 (4) The state finds with respect to the zones described in Subsection (2) that:

1156 (a) agricultural timber, logging, and forest product industries on the lands comprising  
1157 these timber zones have provided a significant contribution to the history, customs, culture,  
1158 economy, welfare, and other values of each area for many decades;

1159 (b) abundant natural and vegetative resources exist within these zones to support and  
1160 expand continued, responsible timber, logging, and other forest product activities;

1161 (c) agricultural timber, logging, and forest product activities in these zones, and the  
1162 associated historic resources, human history, shaping of human endeavors, variety of cultural  
1163 resources, landmarks, structures, and other objects of historic or scientific interest are worthy of  
1164 recognition, preservation and protection;

1165 (d) (i) the highest management priority for lands within these zones is maintenance and  
1166 promotion of forest and vegetation ecosystem health achieved by responsible active  
1167 management in development of historic, existing, and future timber, logging, and forest  
1168 product resources in order to provide protection for the resources, objects, customs, culture,  
1169 and values identified above; and

1170 (ii) notwithstanding Subsection (4)(d)(i), if part or all of any zone lies within a sage  
1171 grouse management area, then the management priorities for such part shall be consistent with  
1172 the management priorities set forth in Subsection (4)(d)(i) to the maximum extent consistent

1173 with the management priorities of the sage grouse management area;

1174 (e) subject to Subsection (4)(d)(ii), responsible development of any deposits of energy  
1175 and mineral resources, including oil, natural gas, oil shale, oil sands, coal, phosphate, gold,  
1176 uranium, and copper, as well as areas with wind and solar energy potential, that may exist in  
1177 these zones is compatible with the management priorities of Subsection (4)(d)(i) in these  
1178 zones; and

1179 (f) subject to Subsection (4)(d)(ii), responsible development of any recreation  
1180 resources, including wildlife, roads, campgrounds, water resources, trails, OHV use,  
1181 sightseeing, canyoneering, hunting, fishing, trapping, and hiking resources that may exist in  
1182 these timber zones is compatible with the management priorities of Subsection (4)(d)(i) in  
1183 these timber zones.

1184 (5) The state finds that the historic levels of timber, logging, and forest products  
1185 activities in the zones described in Subsection (2) have greatly diminished, or are under serious  
1186 threat, due to:

1187 (a) unreasonable, arbitrary, and unlawfully restrictive federal management policies,  
1188 including:

1189 (i) de facto managing for wilderness in nonwilderness areas;

1190 (ii) ignoring the multiple use sustained yield mission of the forest service;

1191 (iii) ignoring the fact that the forest service's parent agency is the United States  
1192 Department of Agriculture whose mission includes providing timber as an important  
1193 agriculture resource; and

1194 (iv) the arbitrary administrative reductions in timber, logging, and forest products  
1195 activities;

1196 (b) improper management of forest vegetation resulting in the overcrowding of old  
1197 growth alpine species and the crowding out of aspen diversity, all of which results in:

1198 (i) devastation of entire mountainsides due to insect infestation and disease;

1199 (ii) reduced water yield;

1200 (iii) increased catastrophic wildfire;

1201 (iv) increased soil erosion;

1202 (v) degradation of wildlife habitat; and

1203 (vi) suppression and threatened extinction of important rural economic activities; and

- 1204 (c) other practices that degrade overall forest health.
- 1205 (6) To protect and preserve the threats described in Subsection (5), the state supports
- 1206 the following with respect to the zones described in Subsection (2):
- 1207 (a) efficient and responsible development, within each timber zone, of:
- 1208 (i) robust timber thinning and harvesting programs and activities; and
- 1209 (ii) other uses compatible with increased timber, logging, and forest product activities
- 1210 including a return to historic levels of timber, logging, and forest product activity in each of
- 1211 these zones;
- 1212 (b) a cooperative management approach by federal agencies, the state, and local
- 1213 governments to achieve broadly supported management plans for the full development, within
- 1214 each timber zone, of:
- 1215 (i) forest product resources; and
- 1216 (ii) other uses compatible with timber activities; and
- 1217 (c) effective and responsible management of wildlife habitat.
- 1218 (7) The state requests that the federal agencies that administer lands within each timber
- 1219 zone:
- 1220 (a) fully cooperate and coordinate with the state and the respective counties within
- 1221 which each timber zone is situated, to develop, amend, and implement land and resource
- 1222 management plans and implement management decisions that are consistent with the purposes,
- 1223 goals, and policies described in this section to the maximum extent allowed under federal law;
- 1224 (b) expedite the processing, granting, and streamlining of logging and forest product
- 1225 harvesting permits, range improvements, and applications to enhance and otherwise develop
- 1226 existing and permitted timber resources located within each timber zone, including renewable
- 1227 vegetative resources;
- 1228 (c) expedite stewardship programs to allow private enterprise to carry out the timber,
- 1229 logging, and forest activities described in this section;
- 1230 (d) allow continued maintenance and increased development of roads, power lines,
- 1231 pipeline infrastructure, and other utilities necessary to achieve the goals, purposes, and policies
- 1232 described in this section and consistent with multiple use and sustained yield principles;
- 1233 (e) refrain from any planning decisions and management actions that will undermine,
- 1234 restrict, or diminish the goals, purposes, and policies for each timber zone as stated in this

1235 section; and

1236 (f) subject to Subsection (4)(d)(ii), refrain from implementing a policy that is contrary  
1237 to the goals and purposes described within this section.

1238 (8) (a) The state recognizes the importance of all areas on BLM and Forest Service  
1239 lands high value lumber and forest product resources but establishes the special Timber  
1240 Agricultural Commodity Zones to provide special protection and preservation against the  
1241 identified threats found in Subsection (5) to exist in these zones.

1242 (b) It is the intent of the Legislature to designate Additional Timber Agricultural  
1243 Commodity Zones in future years, if circumstances warrant special protection and preservation  
1244 for new zones.

1245 (9) The state calls upon applicable federal, state, and local agencies to coordinate with  
1246 each other and establish applicable intergovernmental standing commissions, with membership  
1247 consisting of representatives from the United States government, the state, and local  
1248 governments to coordinate and achieve consistency in planning decisions and management  
1249 actions in the zones described in Subsection (2).

1250 (10) Notwithstanding the provisions of this section, and subject to Subsection  
1251 (4)(d)(ii), the state's mineral, oil, gas, and energy policies, as well as its grazing policies, on  
1252 land within zones described in Subsection (2), shall continue to be governed by Sections  
1253 63J-4-401 and 63J-8-104.

1254 **Section 7. Repealer.**

1255 This bill repeals:
