

181 (c) A community water system serving a population of between 500 and no more than
 182 3300 shall provide the information necessary to establish system-specific standards described
 183 in this Subsection (2) by no later than March 1, 2023.

184 (3) The director shall establish system-specific source and storage minimum sizing
 185 requirements for a community water system serving a population of fewer than 500 based on:

186 (a) at least the most recent three years of a community water system's actual water use
 187 data submitted to the division and accepted by the director;

188 (b) an engineering study submitted by the community water system and accepted by the
 189 director;

190 (c) standards, comparable to those of established community water systems, as
 191 determined by the director; or

192 (d) relevant information, as determined by the director.

193 (4) The director shall:

194 (a) for community water systems described in Subsection (3), establish a schedule to
 195 transition from statewide sizing standards to system-specific standards;

196 (b) establish minimum sizing standards for public water systems that are not
 197 community water systems;

198 (c) provide for the routine evaluation of changes to the system-specific standards; and

199 (d) include, as part of system-specific standards, necessary fire storage capacity in
 200 accordance with the state fire code adopted under Section 15A-1-403 ~~H~~→ and as determined by
 200a the local fire code official ←~~H~~ .

201 (5) The director may adjust system-specific sizing standards, established under this
 202 section for a public water system, based on information submitted by the public water system
 203 addressing the effect of any wholesale water deliveries or other system-specific conditions
 204 affecting infrastructure needs.

205 (6) A wholesale water supplier is exempt from this section if the wholesale water
 206 supplier serves:

207 (a) a total population of more than 10,000; and

208 (b) a wholesale population that is 75% or more of the total population served.
