119 in a general rate case or other appropriate commission proceeding, include in the energy
120 utility's retail rates the state's share of costs:

121 (i) relevant to that proceeding;
122 (ii) incurred by the energy utility in implementing the approved resource decision; and
123 (iii) up to the projected costs specified in the commission's order issued under Section

140 or (ii), the commission may disallow some or all costs incurred in connection with an
141 approved resource decision if the commission finds that an energy utility's actions in
142 implementing an approved resource decision are not prudent because of new information or
143 changed circumstances that occur after:

144 (i) the commission approves the resource decision under Section 54-17-402; or

145 (ii) the commission issues an order to proceed under Section 54-17-404.
